

POST COAL PROM QUEEN

Lily Higham and Gordon Johnstone

Lily and Gordon combine retrofuturistic synths, noisy guitars, glitchy beats and ethereal vocals to create unique electronic pop. They write primarily on speculative topics; climate change and the future of humanity often feature in their lyrics.

Lily and Gordon met in 2014 when they worked for a youth information charity. Before entering the music scene both were published fiction authors, hosted radio shows, published arts journals, and have been active members in the Scottish arts scene for over ten years.

They are self-taught and self-funded musicians and producers. They are passionate about collaboration.
